File formats

Digital- and large format printing:
ideally PDF X4,
for PDF X3, reduce to one layer ready for printing.*

*important notice

The file formats can be created with different programs with various attributes. That can cause numerous errors, e.g. deviation of colours, missing or incorrect fonts, missing elements etc.

To avoid such problems please create your data as a ready to print file in PDF / X-3:2002. To prevent incorrect printing, please feel free to send or upload your original file's preview (JPG) for comparison.

Colors

Color mode: CMYK
Color profile: ISO Coated v2, Coated Fogra 27 / 39

Do not use: RGB and spot colors such as Pantone, HKS and RAL. They will be converted / simulated to CMYK. We cannot guarantee for color differences caused by conversion.

Proof

It is not possible to do color adjustments in the RIP software or at the printer. If color accuracy has high priority, we recommend you a proof beforehand.

The file can be created with several different versions of the color (e.g. small squares with the corresponding CMYK values).

We produce a colorbinding proof on the original material with the original colors. If necessary, you have the opportunity to adjust your file before print.

Reprint „Mega Outdoor Flag“

How to create your print file

Please create your data in the **final format 100 x 400cm**.

Our advice

We recommend a safety space of 4 cm for text, logos or other important elements. This area will be used for the eyelets. (4 cm from the top and left side)

We advice to create the artwork in this area.
