Glass decoration film
GUIDELINE

Format:	final format or scaled
Resolution:	ratio 1:1, 96-150 dpi
	ratio 1:10, 300 dpi
Bleed:	no
Crop marks:	no
Overprint:	deactivated
Fonts:	embedded or converted to paths
Do not use:	alpha channels, clipping paths, masks
Data format:	from PDF/X-3.
File upload:	Printing data can be uploaded in the online shop.
Color:	Foil is pre-coloured and will be cut according to your file. No printing.
Hinweise:	Print and production tolerance is 0,25 %.
	Depending on file format and print material colour deviations may occur during printing.

Notes

Only vector files are to be used for foil plotting!

Pixel files, e.g. photos or gradients, are cannot be used. Please create your data for the motif as vector graphics, otherwise the plotter will not recognise them and will not be able to cut them.

Line weight for motifs, fonts:

min. 1.5 mm.

Font height:

min. 10 mm (with serifs) and 8 mm (without serifs).

No outlines:

Please create only shapes, outlines cannot be plotted.

Glass decoration film
Example image

Design options in two variants.
Note: There is no printing. The pre-coloured foil
will be cut to size according to your file.

1- Positive plot

Shape/letters remain.

2- Negative plot
Shape/letter is removed, area remains

Glass decoration film - up to 110 cm (short side)
Example sketch

Rectangular sticker
## up to 110 cm (of the short side)
produced in one piece

Werbecenter-Berlin GmbH

The division is made into equal parts (as far as possible). **We** produce the parts with **5 mm overlap** for easier application. The division will be made **vertically**. Please consider when ordering and creating files. If custom division is required, please order the segments individually and create print data accordingly. If desired, include 5 mm overlap all around.

Rectangular sticker
over 110 cm (of the short side)
produced with division

Avoid placing fonts and graphics in the intersecting areas of the panels. This way an optimal overall image can be created.

The division of the panels goes directly through the lettering, so there is no seamless transition. There may be some misalignment of the letters during construction.

Glass decoration film - with Contour Cut
Example sketch

Cut contour (cutting line)

The cut outline must be created as a **closed vector path** (do not overlay multiple paths). Please select **100% magenta spot color** and name it **"Cut"** (please do not use any other spot colors in a file).
Additional costs

Depending on the complexity and number, additional costs will be charged. These will be communicated to you before the production starts or can be requested in advance.

! Please create file in 1:1 ratio.

A = File format

B = Final format after confection = Cut Outline

C = Safe area for logo and text 5mm

Print file
